Publication No. US20030060611A1
GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Blatt, Larry
APPLICANT: McSavigen, Jim
APPLICANT: McSavigen, Jim
APPLICANT: Haeberll, Pete
TILE OF INVENTION: Method and Reagent for the Inhibition of NOGO Gene
FILE REFERENCE: MEHBOO, 878-A (400/611)
CURRENT APPLICATION NUMBER: US/09/780, 533A
CURRENT FILING DATE: 2001-02-09
FRIOR FILING DATE: 2000-02-11
NUMBER OF SEQ ID NOS: 6679
SOFTWARE: Patentin version 3.0
SEQ ID NO 1691

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Ribozyme Pharmaceuticals, Inc.
TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions Relate
TITLE OF INVENTION: Levels of Epidermal Growth Factor Receptors
PILE REFERENCE: MEHBOO-956-I (400/018)
CURRENT PILING DATE: 2001-05-03
NUMBER OF SEQ ID NOS: 9645
SOFFWARE: Patentin version 3.0
LENGTH: 17

Sequence 2438, Application US/10209787

Sequence 2438, Application US/10209787

Publication No. US2003021737741

GENERAL INFORMATION:

APPLICANT: Kmiec, Etic B.

APPLICANT: Gamper, Howard B.

APPLICANT: Race, Michael C.

TITLE OF INVENTION: Targeted Chromosomal Genomic Alterations with Modified Single
TITLE OF INVENTION: Stranded Oligonucleotides

FILE REFERENCE: Napro-4

CURRENT FILING DATE: 2002-07-30

FRICK PILING DATE: 2001-03-27

PRIOR FILING DATE: 2000-03-27

PRIOR FILING DATE: 2000-10-30

Sequence 4187, Application US/10209787

Publication No. US20030217377A1

GENERAL INFORMATION:

APPLICANT: Kmiec, Eric B.

APPLICANT: Raice, Michael C.

TITLE OF INVENTION: Stranded Chromosomal Genomic Alterations with Modified Single TITLE OF INVENTION: Stranded Oligonucleotides

FILE REFERENCE: Napro-4

CURRENT PAPLICATION NUMBER: US/10/209,787

CURRENT FILING DATE: 2002-07-30

PRIOR APPLICATION NUMBER: US 60/192,176

PRIOR APPLICATION NUMBER: US 60/192,176

PRIOR PILING DATE: 2000-03-27

PRIOR PLING DATE: 2000-03-37

PRIOR PLING DATE: 2000-03-37

PRIOR PLING DATE: 2000-06-03-01

PRIOR PLING DATE: 2000-06-03-01

PRIOR PLING DATE: 2000-06-06-01

PRIOR PLING DATE: 2000-10-30

NUMBER OF SEQ ID NOS: 4885

SOFTWARPER FOR PRED ID NOS: 4885

TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions Relate
TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions Relate
TITLE OF INVENTION: Levels of IKK-Gamma and PKR
FILE REFERENCE: MHBHD1-664-A (400/050)
CURRENT PELLING DATE: 2002-05-28
NUMBER OF SEQ ID NOS: 8013
SOFTWARE: PatentIn version 3.0
SEQ ID NO 4363
LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ö

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            RESULT 544

US-09-774-414-22/c

is Sequence 22, Application US/09774414

is Patent No. US20020102231A1

is GENERAL INFORMATION:

is APPLICANT: THE Institute of Physical and Chemical Research

it TILLS OF INVENTION: Endonuclease

it TILLS OF INVENTION: Endonuclease

it CURRENT APPLICATION NUMBER: US/09/774,414

it CURRENT FILING DATE: 2001-01-31

is PRIOR APPLICATION NUMBER: 09/306,970

is PRIOR PILING DATE: 1999-05-07

is NUMBER OF SEQ ID NOS: 38

is SOFTWARE: PatentIn Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Query Match 1.0%; Score 12.2; DB 1; Length 18; Best Local Similarity 82.4%; Pred. No. 4.7e+02; Matches 14; Conservative 0; Mismatches 3; Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Query Match 1.0%; Score 12.2; DB 1; Length 18; Best Local Similarity 82.4%; Pred. No. 4.7e+02; Matches 14; Conservative 0; Mismatches 3; Indels
                                                                                                                                                       COMPUTER READELE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: ISM PC compatible
COMPUTER: ISM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: PatentIn Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/09/263,959
FILING DATE: 05-MAR-1999
CLASSIFICATION:
                       ADDRESSEE: Seed and Berry LLP
STREET: 6300 Columbia Center, 701 Fifth Avenue
